

BHUIYASH KUMAR

Associate Software Engineer

+91 7880623036 • bhuiyashkr@gmail.com • linkedin.com/in/bhuiyash-kumar

PROFESSIONAL SUMMARY

Associate Software Engineer with 3 years of experience in Angular, TypeScript, and frontend development, specializing in the US healthcare domain. Proven ability to lead end-to-end project delivery, design scalable data architectures, and build reusable UI components. Expanding expertise in AI integration, including LangChain, Agentic AI workflows, RAG pipelines, and LLM-based automation. Passionate about enhancing user experience, accessibility, and bringing intelligent automation to healthcare applications.

EXPERIENCE

Associate Software Engineer | Infinite Computer Solutions

August 2023 – Present

mCare Online Angular | US Healthcare

- Led the project end-to-end, ensuring timely delivery and alignment with client expectations
- Spearheaded development of Tasks and Members screens, delivering complete UI panels as per client requirements
- Implemented authentication flow with MSAL library to secure access and enhance user management
- Designed and established data flow architecture for core screens, ensuring scalability and maintainability
- Integrated legacy Angular FormKit (v1) seamlessly with the existing Angular framework
- Created CI/CD pipeline with SonarQube integration for code quality standards on Azure DevOps
- Developed tailored search functionality, optimizing user interaction and experience
- Delivered fully functional, client-ready screens by interpreting and implementing new feature requirements

EHRA (Electronic Health Risk Assessment) | US Healthcare | 2025

- Implemented Spanish language support to enhance accessibility for a wider user base
- Added robust input field validations to improve form data integrity and user experience
- Developed conditional rendering of UI components based on dynamic business logic
- Worked with JSX, JSON, and other frontend technologies as part of the tech stack
- Ensured successful deployment to production, meeting functional and quality benchmarks

AI PROJECTS

AI-Powered Resume Screening & Interview Automation System

2024–2025

Technologies: OpenAI APIs, Twilio, VAPI AI, ElevenLabs, MySQL, AWS

- Engineered an end-to-end AI-driven recruitment platform combining resume parsing, job-fit scoring, and automated voice interviews
- Implemented OpenAI-based NLP pipeline to extract candidate skills and match them with job descriptions for compatibility scoring
- Built a voice interview system using VAPI AI and Twilio that asks dynamic, role-specific questions
- Integrated ElevenLabs for realistic speech responses and generated live interview transcripts
- Automated 90% of the screening and interview process, reducing recruiter workload and increasing evaluation consistency

Generative AI Application Development

2024–2025

Technologies: LangChain, OpenAI APIs, AWS Lambda, RAG Pipelines

- Built and deployed Generative AI applications integrating large language models for context-aware text generation
- Designed RAG (Retrieval-Augmented Generation) pipelines using LangChain, improving relevance by 40%
- Developed agentic AI workflows supporting multi-step reasoning and tool-based execution
- Optimized performance through caching and modular design, reducing latency by 30%

TECHNICAL SKILLS

Frontend: Angular, TypeScript, JSX, HTML, CSS, JavaScript

AI & Generative AI: LangChain, Agentic AI, OpenAI APIs, RAG Pipelines, LLMs, CrewAI, VAPI AI, ElevenLabs, Hugging Face

Cloud & DevOps: Azure DevOps, CI/CD, SonarQube, AWS Lambda, AWS S3

Databases: MySQL, PostgreSQL, Vector DB

Auth & Security: MSAL, JWT Authentication, CSRF

Frameworks: .NET Framework, Angular FormKit

Tools & Integrations: Git, GitHub, Copilot, Claude, Postman, JIRA, SQL server Management 22, Insomnia, Visual Studio, Antigravity, VS code.

Other: REST APIs, CRUD Operations

EDUCATION

Bachelor of Technology (B.Tech)

2019 – 2023

Dr. APJ Abdul Kalam Technical University
